Date of Birth: 9 October, 1993 (22 years old)

Profile

I am a Spanish student currently enrolled in the last year of a Multimedia Engineering degree.

However I already have some job experience as a freelance. Mostly I have worked as a Web Developer.

Education

Bachelor's Degree in Multimedia Engineering - University of Alicante
Alicante, Spain — September 2011 - Present

Computer Science studies oriented to the new technologies.

BSc in Computing in Games Development - Institute of Technology of Sligo
Sligo, Ireland — September 2015 - January 2015

Studies abroad in Ireland during the first semester of my last year.

Work Experience

Full Stack Web Developer, Penguin Website Inc.
Freelance, Remote (Client from USA) — December 2014 - Present

Involved in several web application projects. All of them developed under the MEAN stack (MongoDB, Express, AngularJS, NodeJS).

Front End Web Developer, Promethean IT.
Freelance, Remote (Client from USA) — July 2015 - September 2015

Development of static websites with HTML, CSS and JavaScript.

Back End Web Developer, Lone Star Media
Freelance, Remote (Client from USA) — July 2015

Full backend API development for http://ateamo.com

Relevant Projects

Android Game and Backend API
University of Alicante — November 2014

Android App: It is a simple game where the user answers some question and gets points for that. The game also allows the user to send new questions to the data base.

Source: https://github.com/AlexRex/ColorGame

Backend API: It gives all the routes needed to add, delete and get all the questions from a database noSQL.
Used technologies: NodeJS, ExpressJS, AngularJS and MongoDB.

35mm - Social network for photographers
University of Alicante — September 2014 - December 2014

Web application — similar to Flickr — where users can upload their photographs.
Used technologies: PHP, MySql, Javascript, HTML and CSS.

Web: http://alextorres.me/35mm/index.php
Source: https://github.com/AlexRex/35mm

PlayPadel - Social network for tennis players
Personal Project — June 2014 - Present

Web application where tennis players can set up matches with other players.
In beta development.
Used technologies: NodeJS, ExpressJS, AngularJS and MongoDB.
